## EXPERIENCE

Baku Technology Center (01/2026 - Present)

C# Back-end Intern

## ABOUT ME

In 2022, I began my bachelor's degree at Baku State University, majoring in Computer Science. In 2023, I was accepted into the SABAH Groups, where I continue my studies in Computer Science. I have experience in software development, mainly working with .NET technologies. My goal is to create functional, reliable, and user-centered web applications. I have developed my own startup project called "Timoto", a rent-a-car website. The main technologies I used in this project are ASP .NET Core MVC, MS SQL, and HTML/CSS. The source code is available on my GitHub profile. In addition, I have built several frontend websites, which helped me strengthen my skills in HTML, CSS, and React.js. Currently, I am looking for my professional opportunity in the software development field to gain real-world experience, contribute to meaningful projects, and continue improving my technical skills.
